Experiment 9: Exploring AI-Assisted Features and Built-in Analytics (Zia) in Zoho Creator

SIVARATHINAM S

ROLL NO: 241401102

Aim

To explore the AI-assisted features and built-in analytics of Zia in Zoho Creator, and to apply them to the "Gym Membership Enrollment & Front Desk Management" application.

Application Details

- **Application:** Gym Membership Enrollment & Front Desk Management
- **Form:** Membership_Enrollment_Form
- **Report:** Membership_Enrollment_Report
- **Feature explored:** Zia, the AI assistant in Zoho Creator

Concepts

Feature	Purpose
Zia Build Agent (AI developer)	Builds or changes application components from plain-language instructions
Zia analytics and insights	Gives quick answers and insights from the data stored in the application
Zia in Operations	Account-level page to manage Zia features

Procedure

1. Opened the application and the **Build Agent** panel ("Hi, I'm your AI developer") on the left side.
2. Gave a plain-language instruction, for example: *Add a Trainer_Name dropdown field to Membership_Enrollment_Form*.
3. Reviewed the changes suggested by Zia before accepting them.
4. Opened **Operations, Zia** on the Creator home page to view the Zia settings.
5. Used the analytics options on the report and dashboard to ask questions about the enrollment data, such as the count of enrollments by Membership Plan.
6. Noted the results and compared them with the manual dashboard built in Experiment 5.

Prompts and Results

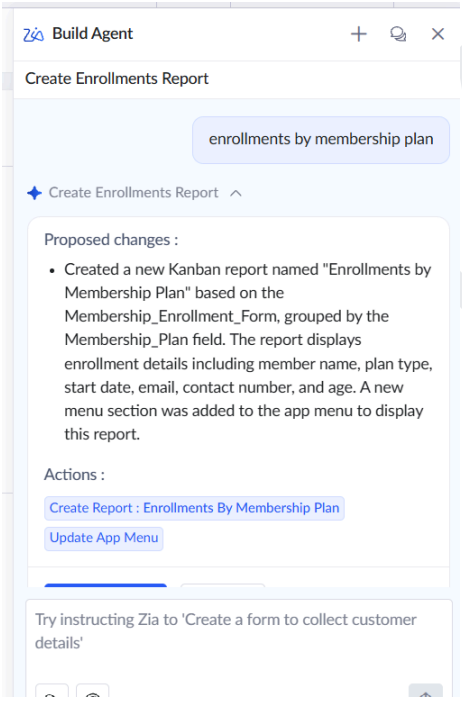

S.No	Prompt or Action	Result
1	Add a field to the enrollment form using Build Agent	Field suggested by Zia (edit as per your result)
2	Ask for enrollments by Membership Plan	Summary generated (edit as per your result)
3	Ask for enrollments by Preferred Activity	Summary generated (edit as per your result)

Observations

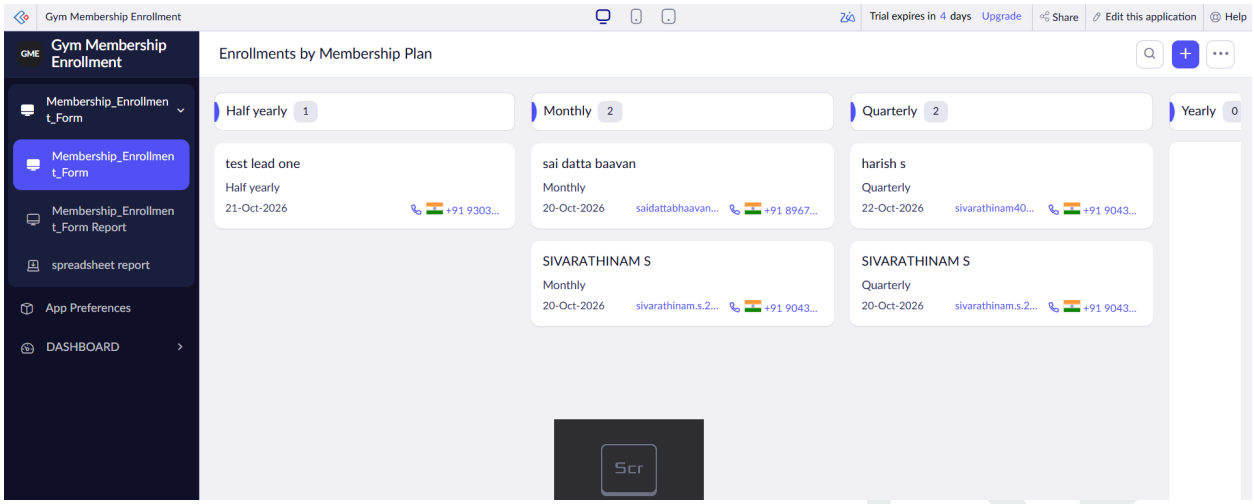

- Zia saves development time by turning plain-language instructions into application changes.
- By default, Zia applies changes to the live application, so work should be done in a test environment first.
- Zia's output is AI-generated and must be reviewed before use.
- Built-in analytics gives quick insights, while custom dashboards give full control over layout and filters.

2. Zia's response or the generated change

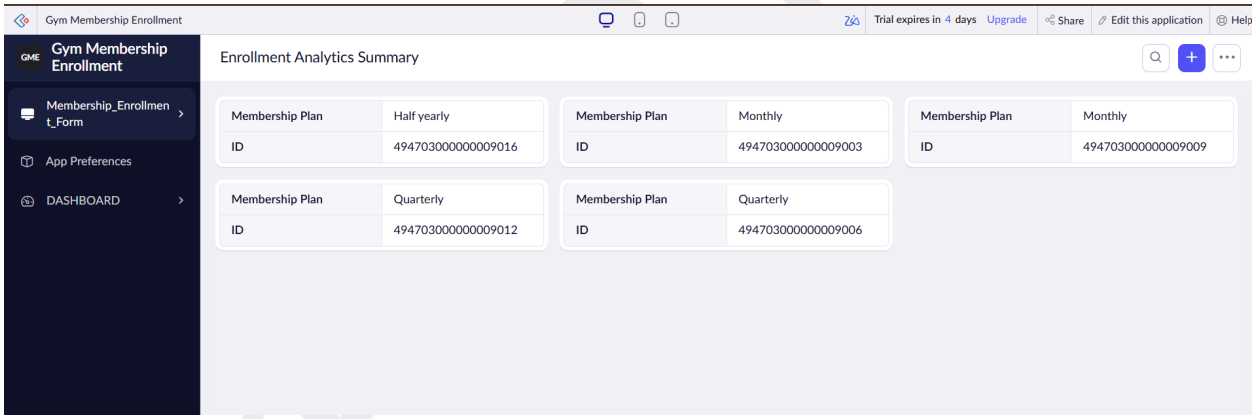

3. Operations, Zia page

4. Analytics or insights on the enrollment data

Result

The AI-assisted features and built-in analytics of Zia in Zoho Creator were explored and applied to the Gym Membership Enrollment application, and the results were reviewed against the manually built reports and dashboard.
